

Cyber Essentials & Cyber Trust Marks

The **Cyber Essentials** and **Cyber Trust** marks are cybersecurity certifications for organisations developed by the Cyber Security Agency of Singapore (CSA). They serve as visible indicators to demonstrate that organisations have put in place good cybersecurity practices to protect their operations and customers against cyber attacks.

Why should my organisation apply?

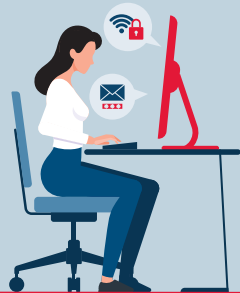

- Serves as a visible indicator of good cybersecurity practices implemented in your organisation
- Provides assurance that your organisation has taken steps to strengthen your cybersecurity
- Builds trust with your customers
- Gives your organisation a competitive edge to attract new business partnerships

Which mark should my organisation apply for?

**CYBER
ESSENTIALS**

- Organisations with less extensive digitalised business operations
- Organisations that are embarking on their cybersecurity journey
- Organisations that have implemented cyber hygiene measures to protect against common cyber attacks

CYBER TRUST
[Tier*]

- Organisations with more extensive digitalised business operations
- Organisations with a higher cybersecurity risk profile
- Organisations that have implemented comprehensive cybersecurity measures that are commensurate with their cybersecurity risk profiles
