

1) Mr Lim Tuan Liang, Director (Digital & Information Forensics), Home Team Science and Technology Agency (HTX) said, "This is a fantastic initiative that brings together experts, solution providers, and organisations to find synergies and values, as well as the chance to collaborate. It strengthens the country's capabilities to address the growing cybercrime and cybersecurity threats."

2) Mr Yu Tat Ming, Chief Executive Officer, PacificLight Power said, "This year marks PacificLight's fourth year of participating in the CyberCall programme, and once again it has proven to be a rewarding experience for us as we engage and connect with cybersecurity solution providers that best fit our technological and security needs. We have successfully implemented an Anomaly Detector & Protector system for the industrial controls at our water treatment plant."

"CSA and TNB Ventures have been instrumental in the country's CyberCall initiative, bringing solution providers and businesses together to strengthen information structures and alleviate cyber vulnerabilities. PacificLight is proud to support the CyberCall initiative and will continue working closely with the industry to tackle concerns and develop innovative cybersecurity solutions."
