

Set A Strong Password

Ghost writer

Security Tips

- Use the passphrase method to create a password that is difficult for others to guess.
- Your password should comprise at least 8 alphanumeric characters with a mix of upper and lower case letters.
- Do not choose a dictionary word as your password.
- Do not reveal your password to anyone. Do not store your passwords on your computer or write them down.
- Log out and clear the Internet cache after all transactions.
